

**MAINTAIN
GUT HEALTH
& BALANCE.**

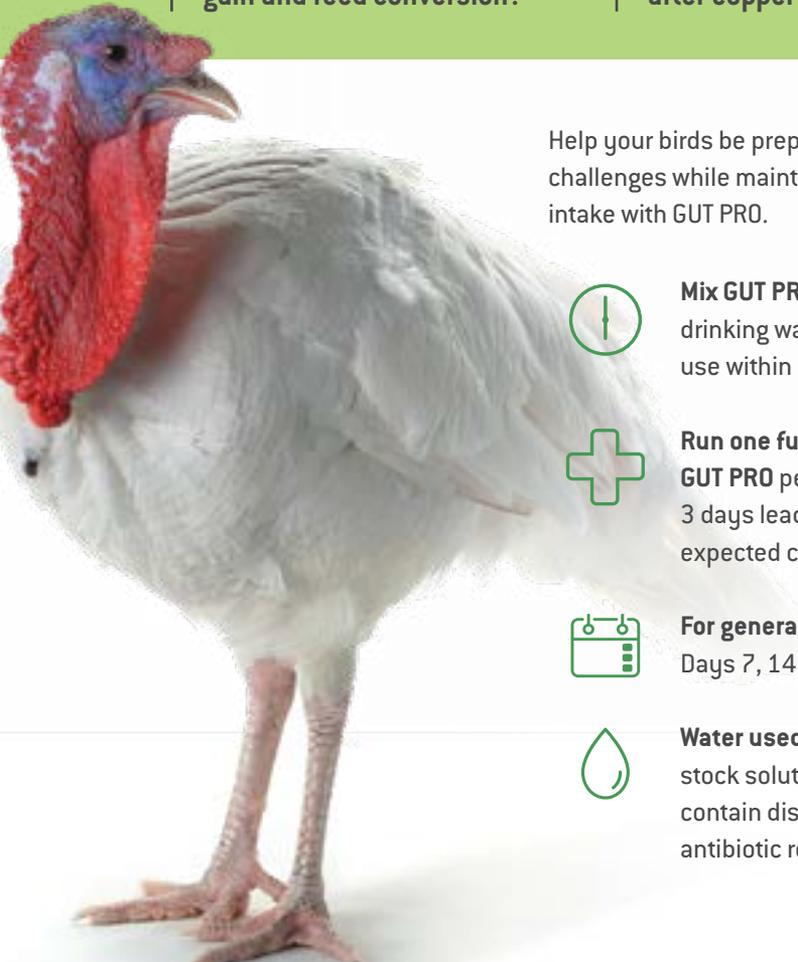

Get ahead of health challenges and secondary bacterial infections.

Give your birds the *Bacillus* boost they need with GUT PRO®.

What if you could target both Necrotic Enteritis (NE) and avian pathogenic *E. coli* (APEC) without harming average daily gain and feed conversion?

What if you could return the gut to a normal microbial homeostasis even after copper therapy?

Help your birds be prepared for health challenges while maintaining water intake with GUT PRO.

Mix GUT PRO in the drinking water line and use within 6 hours

Run one full dose of GUT PRO per day for 3 days leading up to an expected challenge

For general health, run on Days 7, 14 and 21

Water used to make the stock solution should NOT contain disinfectants or antibiotic residue

Improve gut health by combating microbial imbalance.

Use the *Lactobacillus* in GUT RESTORE® to maintain a healthier gut microbiota.

What if you could combat dysbacteriosis?

What if you could reestablish gut microbiota after antibiotic treatment?

Help your birds' GI tracts return to normal health after periods of stress, antibiotic treatment or copper therapy that are known to wreak havoc on the gut.

Mix GUT RESTORE in the drinking water line and use within 6 hours

Flush into the line immediately prior to chicks arriving and a partial flush 4 hours after birds arrive

Water used to make the stock solution should NOT contain disinfectants or antibiotic residue

Recommended Schedule

DAY	PRODUCT
1-2	GUT RESTORE
7	GUT PRO
10	GUT RESTORE
14	GUT PRO
21	GUT PRO

NOTE: Products should be mixed in with the amount of stock water that allows for bird consumption in six hours. Flush water lines before adding product to water.

Storage Information

- For ideal **long-term storage**, product should be kept refrigerated.
- For **short-term storage**, product can be kept below 75 degrees.
